Careers Awareness Timeline Project	Careers Awareness Timeline Project	Part of the STEM careers project (line 23) and led by Centre for Education and Industry, University of Warwick: piloted in 28 schools and seeking “to establish how schools can embed a more systematic programme of [STEM] careers awareness into the existing subject curriculum – initially in the first three years of secondary education.” (<i>Lightening Ladders, Shortening Snakes</i> , glossy summary of the pilot). Very little material online as yet.	STEM + ICT	other	United Kingdom	English	yes	website	http://www.shu.ac.uk/research/cse/stem-careers.html

cc4g (Connect Create Go, previously Computer Clubs for Girls)	cc4g (Connect Create Go, previously Computer Clubs for Girls)	Material for schools that's tied to the National Curriculum in England and Wales at ages 9-11 and 11-14 years (Key Stages 2 and 3)– is interesting to look at the reasons for the change from an initiative for girls to a “gender neutral” one: “What we've achieved so far”: “CC4G was developed in 2005 exclusively for girls in response to the gender imbalance within the IT industry. Currently, only one in five of the UK's IT workforce are women and only one in five of those undertaking IT-related degree courses are women. CC4G has developed a fun and educational package that has proved a massive hit with 10 -14 year old girls in over 3,600 schools across England. ... The next generation of CC4G aims to preserve the original objective of the project by encouraging more girls, and boys, to rethink their perception of the IT industry and to consider a technology related career. By redesigning CC4G to be more gender neutral we also hope to respond to huge demand from schools to make CC4G suitable for use within curriculum time - in a co-ed, or girls only environmer	teaching ICT	primary + secondary	United Kingdom	English	yes	website	www.cc4g.net

Edinburgh Women's Training Centre: Edinburgh Women's Training Course	Edinburgh Women's Training Centre: Edinburgh Women's Training Course	1986 -??: the first women-only vocational training project in Scotland. Set up with ESF money and aiming to train disadvantaged women who wanted to (re) enter the labour market in computer technology. "Since 1992, the content of the training has shifted from computing (programming and hardware) to IT applications, with graduates typically going into conventionally female jobs in administration rather than into conventionally male jobs in computing. The trainees are selected on the basis that they are unemployed women who have low, unrecognised or no relevant qualifications and who are disadvantaged in one or more of the following ways: lone parents, returners, over 40 years old, disabled, from ethnic minorities and/or from neighbourhoods with high unemployment. Twenty-four women are recruited each year. Training is (currently) provided 3 days per week over a full school year, with half a day devoted to personal development and communication skills and the rest to IT including the European Computer Driving Licence (ECDL). The training plus travel and childcare are all free." Imp	ICT + gender	other	United Kingdom	English	yes	website	http://www.rcss.ed.ac.uk/sigis/public/displaydoc/full/D03_2.07_UEDIN1

Games for Girls (and boys)	Games for Girls (and boys)	A semi-regular event run by the BCS (The Chartered Institute for IT, previously the British Computer Society): from the website It ran in Dec 2005 and Dec 2006 as Games for Girls and on IWD in 2008 as Games for Girls (and Boys). It is esigned for children, accompanied by an adult and for parents, grandparents etc. The event is structured around non-aggressive games. Thus, makes the (troubling?) assumption that computer games for girls means non-aggressive games. Info on events is available from top three search results in reference url. I-Curriculum	I-Curriculum	What key skills do we need to be digitally literate? How can we function effectively in an information-rich world mediated increasingly by digital technologies? What is the difference in being able to operate technology and having it transform thinking? The project examined how the various partner countries - Germany, Greece, Romania, Spain and the UK - have responded and should respond to these challenges within school practices.	teaching with ICT	primary + secondary	United Kingdom	English	yes	website	http://www.futurelab.org.uk/projects/i-curriculum
Improving guidance on STEM* subject choice and careers	Improving guidance on STEM* subject choice and careers	Part of the government's STEM agenda: The Centre for Science Education at Sheffield Hallam and VT Enterprise "are developing a wide range of curriculum resources, careers workforce resources and continuing professional development over the life of the project under the theme of 'enthusing students, equipping professionals, supporting employers'." Some of these resources and initiatives are listed separately – generally ICT/computing are under-represented within these though it is clear that they are included. STEMNET	STEMNET	Not specifically related to ICT or to gender - but this is a huge STEM initiative so has to be included here: there is a great deal of material on their website. They aim to promote STEM and to encourage more people to choose these subjects. They coordinate the STEM ambassadors scheme – people who work in STEM who go into schools – a big programme that should arguably have a listing of its own. The UK Resource Centre for Women and other groups have worked closely to increase the representation of women among STEM ambassadors. UKRC	UKRC	The UK Resource Centre for Women was set up in 2004 by the government following Greenfield's SET fair report (see Phipps 2008, p.132-134). The UKRC is led by a partnership including the University of Cambridge, the University of Oxford, the Open University, Sheffield Hallam University, Queen Mary University of London, with Bradford College as the lead partner. It is funded by the Department for Business Innovation and Skills. It works strategically across the state, the corporate world, activist groups etc to promote and support women in SET. It coordinates and is involved in such a large number of projects that these are listed separately.	STEM + gender	other	United Kingdom	English	yes	website	http://www.ukrc4setwomen.org/

Wider Horizons workplacement scheme	Wider Horizons workplacement scheme	A UKRC run pilot programme in the Yorkshire and Humber region. "The scheme in South Yorkshire provides two or three-week placements for girls in non-traditional jobs. The aim is to provide girls with alternative career knowledge and experience, ensure they can assess their career options with greater objectivity, increase their awareness of the opportunities available, stimulate their interest in science, engineering, construction and technology, and build their confidence and skills through challenging and interesting placements." (UKRC website) The link at the end is to a summary of an evaluation of the project. They are seeking to roll out the scheme across the UK.. Women into Computing	Women into Computing	Set up in 1984 as a collaboration between computing and social science academics, this overtly political and feminist collective later had members from teaching and industry: it worked to promote computing for girls and women and organised events for schools girls and teachers, it disbanded shortly after its final 2005 conference – there is very little trace of it left on the web – the reference at least shows you its logo and that it did once exist!	ICT + gender	other	United Kingdom	English	yes	website	http://www.scenta.co.uk/careers/diversity/cit/4147/women-into-computing-wic.htm
Women into Science Engineering and Construction (WISE)	Women into Science Engineering and Construction (WISE)	This is a long -running campaigning group set up in 1984. A notable feature is the WISE buses which were kitted out with equipment (including resources relevant to technology) and which visited schools - usually for a few days. The buses were discontinued in 2005 but WISE continues to campaign around gender and science and engineering and now also construction and mathematics and continues to produce materials aimed at teachers and students and events/activities. See Phipps (2008) p.54 57 for a critical account.	STEM	secondary	United Kingdom	English	yes	website	http://www.wisecampaign.org.uk/

Women of Outstanding Achievement in Science, Engineering and Technology	Women of Outstanding Achievement in Science, Engineering and Technology	An annual UKRC run initiative – women are selected from nominations, photos are taken and then there is a launch of that year's photos – the portraits go for display to particular venues including the Royal Society. This initiative aims to highlight the inspiring women who work in SET and so is relevant to girls and women at all stage. Although like most SET stuff ICT/Computing is under-represented some of the chosen women are from these fields (there is info on 18 of the 24 women featured of whom one is a Professor of computer science (Wendy Hall) and two are leaders in the field of IT (Ann Budge, Rebecca George).
