## Materials for Teachers (e.g. for teacher training)

name (in English)	name (in your language)	description	main focus	school level	country	main language	English version	format	reference	resource analysis
BMUKK - educational principle: education towards equality of women and men	BMUKK - Unterrichtsprinzip Erziehung zur Gleichstellung von Frauen und Männern	The Ministry of Education has launched the educational principle "Education for Equality of women and men" in the curriculum of the most school types. This corresponds to the policy of Gender Mainstreaming, which is being confessed by the European Union and the Austrian Federal Government.	gender issues	primary + secondary	Austria	German	partially	website	<a href="http://www.bmukk.gv.at/schulen/unterricht/prinzip/erziehung_gleichstellung.xml">http://www.bmukk.gv.at/schulen/unterricht/prinzip/erziehung_gleichstellung.xml</a>	no
Gender.School.at	Gender.Schule.at	Interested teachers, pupils, all people, who are working in an educational establishment, and persons who are interested in the theme 'Gender and Education' can find information about the theme of gender sensible education, related projects and much more.	ICT + gender	primary + secondary	Austria	German	no	website	<a href="http://www.gender.schule.at/">http://www.gender.schule.at/</a>	no
LearningCenter University Vienna - Gender mainstreaming and new media	eLearningCenter Universität Wien - Gender Mainstreaming und neue Medien	The approaches of gender studies are important sources for the epistemological reflection of shifts in teaching and science, which are related to the introduction of new media. Conversely, reflecting new media, e.g. from a perspective of gender differences, can add to the extension of gender theory. One challenge is to put together gender mainstreaming, findings of gender researches and new media in a mutually inspiring way. Jo Sanders website	Jo Sanders website	An enormous collection of materials by Jo Sanders a gender equity activist/consultant in the US and some very useful looking links, most to do with ICT. These need looking at in more detail at some point. For now I record her definition of ICT: "We are still dividing life up into things that girls and women are supposedly good at, and others that boys and men are supposedly good at. As a result, each sex finds parts of life off limits. Gender equity is the effort to stretch the limits so that everyone can experience life to the fullest."	ICT + gender	primary + secondary	Non-EU country	English	yes	website	<a href="http://www.josanders.com/educators.html">http://www.josanders.com/educators.html</a>	no

Gender view on school system	Rodový pohľad na školstvo	Gender occupational segregation in education shifts due to asymmetric evaluation "male" and "female" work on one of the few places in the hierarchy of branches of national economy. Gender burden of education as a "female" sector affects women and men who engage in it. A large gender differences lie in the education itself. As one of the most serious risk, we therefore identify the situation of the main actors - teachers and teacher. Futuremorph	Futuremorph	Part of the STEM careers project based at the Centre for Science Education at Sheffield Hallam University and funded as part of the government's STEM agenda. Although a general careers info site it has specific sections on opportunities for girls/women and the case studies are female dominated. Technology (and maths) tend to get a lot less attention than science. Also technology tends not to mean IT e.g. "technology can make water safe for all". The material is split by age group (11-14, 14-16, 16-19+) and there are dedicated versions for parents, teachers, careers advisors	STEM + gender	other	United Kingdom	English	yes	website	<a href="http://www.futuremorph.org/">http://www.futuremorph.org/</a>	no
ICT chapter in Genderwatch	ICT chapter in Genderwatch	Genderwatch is a collection of chapters on gender issues aimed at teachers – each chapter has activities and suggested further reading. As well as ICT, there are chapters on maths, science, design and technology and many relevant cross-curricular issues such as classroom interaction. The ICT chapter focuses on attitudes (the stereotypes underlying these and ways to counter them) and access (choosing resources, organising group work, challenging the current curriculum). ICT is largely understood to mean computers but I suspect that's a weakness of the National Curriculum rather than the chapter authors.	ICT + gender	primary + secondary	United Kingdom	English	yes	book	Totraku, P. & Loveless, A. (2007) Information and Communication Technology (ICT). In: K. Myers & H. Taylor with S. Adler & D.
